

ven surface from acidic to basic, which effectively changes the dyeability of the materials modified. The modification proposed can change the electric charge on a fibre surface from negative to positive, which creates the possibility of the further functionalisation of fabrics by depositing particles of metal sols and oxides as well as organic particles with opposite charges. Such compounds are capable of imparting antibacterial or deodorising properties to fabrics.

It has been confirmed that the surface modification of PLA nonwovens allows one to impart antibacterial properties to these fabrics.

Acknowledgment

Financial support was obtained from the project entitled "Biodegradable fibrous products", realised under Contract Number POIG 01.03.01-00-007/08-00, and co-financed by the European Union within the framework of the Operational Program – Innovative Economy – IE PO, financed by the European Regional Development Fund – ERDF, which is gratefully acknowledged.

EGE MEDITEX-2012 International Congress on Healthcare and Medical Textiles

May 17-18, 2012 Izmir, Turkey

Organiser: Textile Engineering Department of Ege University in Izmir, Turkey

EGE MEDITEX congress will bring together international specialists from manufacturers, research institutes, universities and will provide an opportunity for the exchange of the latest information and knowledge on healthcare and medical textiles.

Topics

- New developments in medical textiles and health care
- Biotechnology applications for medical purposes
- Smart and interactive textiles
- Comfort in medical textiles and health care
- Wellbeing
- Hygienic textiles
- Antimicrobial textile materials
- Special garments for medical purposes
- Bandages and corsets
- Personal protection
- Fibrous implants
- New textile materials in medical applications
- Testing and standardisation of medical textiles
- Textile-based drug release systems
- Monitoring systems for medical applications
- Economical dimensions and marketing of medical textiles

For further information please visit <http://www.egemeditex.ege.edu.tr>

We look forward to seeing you at the EGE MEDITEX- International Congress on Healthcare and Medical Textiles in May 2012!

Assoc. Prof. Perrin Akcakoca Kumbasar Ph.D. Eng. - Chairman of the Organizing Committee

Ege University, Engineering Faculty, Department of Textile Engineering, Bornova Izmir
