

- fourthly, the development of reserves for sustainable growth and development of the textile industry through the use of integrated management tools at the national level and that of individual enterprises within the industry;
- fifthly, popularisation of national textile products on the domestic market and lobbying Chinese textile manufacturers to maintain their ability to compete against imported goods.

The theses and recommendations mentioned above are aimed at assisting in the sustainable development of the national textile industry of China as a whole and can be also used to improve other sectors of the consumer goods industry. At the same time, active support for sustainable and competitive development of the textile industry in China allows to create a new margin of safety for the Chinese economy and secure unconditional leadership for the textile industry in the long term.

XXI Seminar on 'New Aspects of the Chemistry and Applications of Chitin and Its Derivatives'

INVITATION

On behalf of the Board of the Polish Chitin Society I have both a pleasure and an honour to invite you to participate in the **XXI Seminar on "New Aspects of the Chemistry and Applications of Chitin and Its Derivatives"** which will be held in **Szczecin, Poland, September 16th – 18th, 2015**.

The aim of the conference is to present the results of recent research, development and applications of chitin and chitosan.

It is also our intention to give the conference participants working in different fields an opportunity to meet and exchange their experiences in a relaxing environment.

Best regards
Malgorzata M. Jaworska
Ph.D., D.Sc., Eng.
