17. Lodz, on the other hand, was granted access to the first goods and passenger station at Rokiciny in 1848. Of key importance, however, was when Lodz was connected in 1866 to the Warsaw-Vienna Railway line (operating since 1845) as it meant constant and direct contact with the rest of the country.

 34. According to Stefan Voigt “The time period chosen can also have an impact on the number of available observations. Although it might be interesting to look at the implementation record of some institution for the last 100 years, if accurate observations cannot be made over the entire period, it might be more productive to look at a shorter period with better data (Voigt S. How (Not) to Measure Institutions, *Journal of Institutional Economics*. 2013; 9(1): 18).
