## XIPS 2013

### 9th International Conference on X-Ray Investigation of Polymer Structure

3-6 DECEMBER 2013, Zakopane, POLAND

**XIPS 2013 is organised by the University of Bielsko-Biala and Catholic University of Leuven in collaboration with the Committee on Materials Science of the Polish Academy of Sciences**

#### Deadlines:

- registration and payment: **15.09.2013**
- abstracts: **15.10.2013**

#### CONFERENCE TOPICS

The triennial XIPS conference provides a forum for discussions related to the present state of methods and achievements in structural investigations of polymers.

The conference will feature a wide range of topics, including:

- X-ray and neutron scattering techniques,
- X-ray imaging, IR and NMR spectroscopy in studies of polymers and their composites, colloids, porous media, membranes, surfactants and biomaterials
- Development of methods and techniques in X-ray studies of soft matter
- Software and databases for soft matter structure investigations
- Analysis of X-ray and neutron scattering data and modeling of material structure
- Morphology and thermal behaviour of polymer materials

#### Chairman of the INTERNATIONAL ADVISORY BOARD

**Harry Reynaers**

Catholic University of Leuven, Belgium
